

# Masterbatches delivery list CAPROWAX P™

**Masterbatches** for Bioplastics/Biocomposites/Blends: PLA, PBS, PHA, PCL, CAPROWAX P™/Blends/BioMineralComposite, Bio-NFC/WPC, Casein, PVOH, Polysaccharides/Derivates, PVAc/Blends, Bio-TPE/UPR, NIPU.

As colourants are used biobased, bio-mineral and/or harmless, inorganic pigments with sustainable, lightfast brightening prefers without Titanium Dioxide. The carrier material is compostable and waterproof.

Colourations of bioplastics comply the specifications of DIN EN 13432.

<b>tex: suited for colouration of filaments</b>				
<b>MB500 = 500g sample for process engineering experiments</b>				

Addition of translucent CAPROWAX P - Masterbatches to different bioplastics: 0,5-4%. All shades of colour are comparable or similar to the product colours.

Masterbatches are produced batchwise together with compostable carrier material and pigments by contract manufacturing. CAPROWAX P™- carrier material consist of aliphatic, home/industrial compostable certified polyester and modified, readily biodegradable, renewable, GMO-free plant oil.

The compostability of carrier material is examined by MFPA, University Weimar:

Test material: CAPROWAX P® 6006

Test certificate No.: P31029-05 according to DIN EN 13432

Translucent to transparent, pearlescent or full covering colouration:

Injection- / Vacuum- / Blow- / Compression- / Melt-Moulding,  
Mono-/Multifilaments, Foils/Sheets, Hotmelts, NF-BioComposites,  
Thermoplastic Plasticine, Foams and Coating.

Pigments are biobased, biomineral or calcined, pigmentlike Kaolin and/or of inorganic, synthetic production. They are harmless, lightfast, non-migratory, temperature stable, insoluble in water, comparable with natural, mineral pigments and already mineralised. They are low-dusty incorporated in compostable carrier material and masterbatch pellets are added to different bioplastics in a range of 0,5-6%.

Processing at 90-200°C, short time up 220°C. In coloured final products content of each separate pigment is ≤1%.

Colouration of bioplastics comply the specifications of DIN EN 13432.

Addition of CAPROWAX P - Masterbatches to different bioplastics: 0,5-4%.

A brightening without Titanium Dioxide is possible. The palette of masterbatches is changed to the eco-friendly, soil-related, calcined, pigmentlike Kaolin (FK) as white pigment. Titanium Dioxide will be used strong reduced only. The biomineral, Calcium Carbonate is used as a white pigment with gentle covering brightening.

All shades of colour are comparable or similar to the product colours.

Your order of CAPROWAX P™ - Masterbatches see page 4

Page 4 of 4

Your order of CAPROWAX P™ - Masterbatches

See colour palettes page 2-3: Shades of colours + code

Technical samples: You can get up to 4 samples a 50g pellets free of charge  
For additional process engineering experiments  
you can get 500g MB500 samples see page 2-3

New MB-Recipes: Coloured CAPROWAX P™ - Buttons on request.

Supply quantities: 100 kg, 200 kg, 500 kg  
+/- 25 kg: After your selection you will get an  
offer about location-based, direct delivery

25 kg PE-Bags in carton or on palett For a better raw material procurement a  
yearly forecast is required  
\*) Since corona crisis the delivery of raw  
material is temporally delayed

Market area: European Union  
Prices: According to offer  
Payment conditions: According to offer  
Delivery date \*): after completely delivery of raw material to  
the toll manufacturer plus up to 6 - 7 weeks  
Miscellaneous: Product infos and SDS
