Page 2 of 10

Properties / Data / Description

Form	Button, Film, Pellets		
Content of coloured pigment		%	1
Bulk density	ISO 60	g/l	>550
Density	ISO 1183	g/cm ³	>1,1
Lightfastness *)			7-8
Residual humidity (LOD)	105 °C/1h	%	< 0,3
Softening beginning	DSC	°C	57-63
Remark:	AR = acid-/alkali stable heatstable up to 200-220 °C / acid sensitive		
*) Data of pigment producer	Natural substances may cause fluctuations in the measured values.		

Description Direct compounds CAPROWAX P Ultramarine family contain BM42030 with Calcite (BM) or MM65030 with Kaolin, calcined (FK) Coloured with Ultramarine pigments or mix of Ultramarine/Iron Oxide and Kaolin calcined(FK) for brightening without addition of TiO₂ The binder is a thermoplastic, waterproof, compostable polymer/ wax blend. The product comply the specification of DIN EN 13432
